

# This time it's personal

## Livecoding a personal R package

[bit.ly/laerug\\_pkg\\_cloud](https://bit.ly/laerug_pkg_cloud)

[bit.ly/laerug\\_pkg\\_repo](https://bit.ly/laerug_pkg_repo)

2020-02-10

We're going to make a package  
**right now**

```
usethis::create_package("mbmisc2")
```

```
library(devtools)
```

```
library(usethis)
```

```
use_r("labs_wrap")
```

```
use_package("ggplot2")
```

```
use_package("tibble")
```

```
use_package("dplyr")
```

```
use_package("stringr")
```

**Build**

**R CMD Check**

# Edit DESCRIPTION

```
use_mit_license("Your Name")
```

```
use_roxygen_md()  
document()
```

**Build**

**R CMD Check**

```
use_test("labs_wrap")  
test()
```

use\_git()  
use\_github()

# Resources

**R Packages, 2nd Edition:** The work-in-progress second edition of R Packages. Uses the most cutting edge tools to make your life easier. Free online.

**R Packages, 1st Edition:** The first edition of R Packages. Still very good! Free online.
